Projects

NERCOMP
HTML5, Sass, JavaScript, WordPress. https://nercomp.org
- Developed a fully responsive website that focused on meeting WCAG 2.1 AA accessibility standards and creating an effective user experience.
- Created a website wizard to launch along with the site, smoothing the transition for users who were accustomed to the previous site.
- Refined filtering UI to be able to filter jobs by location and type

Siegfried MYJourney®
Vue.js, Vuex https://www.siegfriedgroup.com/my-journey/
- Created an inspirational and memorable user experience that communicated MY Journey®'s purpose and goals to engage Siegfried's target audience of outgoing, young professionals
- Coded site to include multiple audio and visual elements, pushing beyond just a standard website experience.
- Utilized WordPress JSON REST API to make content dynamic and simple to replace and change.

Star Capital Financing iOS App
Vue.js, Cordova, Framework 7, Google Firebase - Star Capital Financing on Apple's App Store
- Developed a feature to allow salesman to produce flyers with pictures taken from device to drive the sale of construction equipment right through the app.
- Enhanced the app's calculator feature to produce unique financing estimates to prospective buyers.
- Launched profile feature to allow users to update information.
